PROJECTS

Audio AD

Developed Unity application as a proof of concept for an audio centric software and hardware suite to help filmmakers focus on their work without having to micromanage their crew. Details on the project, including demo videos are available at github.com/ytulsiani/Audio-AD.

Mauled By Trump

Developed website to raise money for the ACLU that generates gifs with an image uploaded by the user. Software used to build this includes Node, Python, and OpenCV. Website is live at mauledbytrump.com and the code is available at github.com/ytulsiani/Trump-WWE.

BuzzHop

Developed Game Boy Advance game in C. The game is similar to the classic game Frogger in the sense you must avoid enemies and reach to the other side before losing a certain number of lives. The code for this game is available at github.com/ytulsiani/Buzz-Hop.

iTrans Vertically Integrated Project

Developed admin reporting tools with data extracted and analyzed from MySQL databases to quantify bus bunching and headway issues in Georgia Tech's transportation system.

Tech The Halls Website

Developed website for a non-profit organization using Bootstrap and several JavaScript libraries and frameworks like jQuery. Website is live at techthehalls.gtorgatech.edu and the code is available at github.com/ytulsiani/TechTheHalls.
