## SKILLS

**Languages:** Java, Python, Ruby, JavaScript, C, Assembly, Bash, SQL

**Technologies:** Openstack, AWS, Concourse CI, Heroku, Cloud Foundry, Android Studio, Chef, Unity, Bosh

**Frameworks and Libraries:** NodeJS, Ruby on Rails, Angular, JavaFX, OpenCV, Bootstrap

## ACTIVITIES

GreyHat Infosec

Used tools like Metasploit and Wireshark to see how penetration testing is done in the field by deploying vulnerable Linux VMs on my system.

Vibha · President

Helped start a Georgia Tech chapter for an organization raising funding and awareness for education for children in developing countries. Led club of 15 volunteers to host multiple successful awareness events and campaigns that raised thousands of dollars.

Tech The Halls · Vice President of Marketing

Worked in executive board for an organization promoting inner-city education through connections. Responsible for finding innovative ways to increase mentor, student, and corporate sponsor awareness. Developed website for the club on bootstrap located at [techthehalls.gtorg.gatech.edu](http://techthehalls.gtorg.gatech.edu).

FouroFour Co · Visual Artist

Worked in creating visual content for local Atlanta brands to market their company and products.

Atlanta Humane Society

Volunteered at a humane society in dog rehabilitation and adoption center. Took photos of the adoptions animals and managed their website with new animals.

## SUMMARY

I am a 3rd year Computer Science major looking for a **Fall 2018 internship** in a software development role. I will be working at Pivotal Software in San Francisco, CA this summer.

## EDUCATION

Georgia Institute of Technology (Georgia Tech)  
B.S. Computer Science

August 2015 - December 2018

Concentration in Information Internetworks and Media  
Dean's List

## EMPLOYMENT

Ultimate Software  
Software Engineering Intern

Weston, FL  
May 2017 to Aug 2017

- Worked in a devops role for Platform as a Service team supporting Pivotal Cloud Foundry
- Developed pipelines for continuous integration and automation for tasks such as SQL auto-recovery and backup on critical user data
- Migrated Chef deployments to Bosh with **Ruby** and **Python** to speed up deployment time for development teams
- Created tools to manage virtual machines on Openstack

The Home Depot  
Software Engineering Intern

Atlanta, GA  
May 2016 to Aug 2016

- Developed Proof of Concept allowing for the development of an integrated backend over multiple store fronts with **Javascript** and **Angular** to allow Home Depot to have a single interface for multiple store fronts
- Helped decrease content deployment time from days to hours

PhD Founders  
Founder

Schaumburg, IL  
Sep 2014 to Feb 2017

- Started a tutoring company to provide low cost tutoring to over 30 students ranging from first grade to college
- Managed 3 employees and developed a sustainable business plan
- Designed [phdfounders.com](http://phdfounders.com)

Georgia Institute of Technology  
Visual Content Creator

Atlanta, GA  
Apr 2016 to Current

- Created content for Georgia Tech including photos, videos, and graphics using Adobe software
- Managed Georgia Tech's social media including Facebook, Instagram, Twitter, and Snapchat

## PROJECTS

Computer Science Creativity

Wrote a Medium article discussing the benefits of having a creative hobby in computer science. The article was featured on multiple tech news sites and blogs, including the **front page of Hacker News**. The article is published at [bit.ly/csCreativity](http://bit.ly/csCreativity).

Undergraduate Research: iTrans

Implemented machine learning algorithms in **Python** connected to a MySQL database to predict bus arrival and departures for Georgia Tech's busing system. These algorithms will be used to provide accurate readings for the campus busing arrival estimator API.

Audio AD

Developed **Unity application** as a proof of concept for an audio centric software and hardware suite to help filmmakers focus on their work without having to micromanage their crew. Details on the project, including demo videos are available at [github.com/ytulsiani/Audio-AD](https://github.com/ytulsiani/Audio-AD).

BuzzHop

Developed Game Boy Advance game in **C**. The game is similar to the classic game Frogger in the sense you must avoid enemies and reach to the other side before losing a certain number of lives. The code for this game is available at [github.com/ytulsiani/Buzz-Hop](https://github.com/ytulsiani/Buzz-Hop).

PoBot

Developed a Facebook Messenger bot that allows a user to discover new poetry. Used **NodeJS** and **Python** to build this and hosted it on Heroku. You can message the bot at [m.me/poetryfinder](https://m.me/poetryfinder) and the code is available at [github.com/ytulsiani/Poem-Dispenser](https://github.com/ytulsiani/Poem-Dispenser).

MauledBy

Developed website to raise money for the ACLU that generates gifs with an image uploaded by the user. Software used to build this includes **NodeJS**, **Python**, and **OpenCV**. Website is live at [mauledbytrump.com](https://mauledbytrump.com) and the code is available at [github.com/ytulsiani/Trump-WWE](https://github.com/ytulsiani/Trump-WWE).
